Staff Report

Item # 5F

To: Lemoore City Council
From: David Wlaschin, Public Works Director
Date: August 8, 2006
Subject: Bid Authorization – Chlorine System Replacement/Tank Repiping Projects

Background:

Staff has worked with the City Engineer on plans for the replacement of the water chlorination system and tank repiping and is requesting authorization to go out for bids.

The projects identified in the Capital Improvement Program involve the elimination of chlorine gas at two of our current well sites. This conversion to hypochloride will eliminate the use of chlorine gas at the final two sites in our water system. The other work will be the replacement of water piping installed in 1972 at the water tanks located at 40 'G' Street. The piping has become deteriorated over the years and must be replaced to insure our ability to provide water service from this site.

The project will be awarded in October and work will be completed over the winter during lower water demand.

Budget Impact:

Both items are in the proposed 2006/08 Capital Improvement Program budget for \$575,000.

Recommendation:

That Council authorize Staff to go out to bid for the replacement of the water chlorination system at our well sites and at 40 'G' Street.
