Date: October 29, 2008

Item # 31

To: Lemoore City Council

From: Joe Simonson, Parks and Recreation Director

Subject: Tire Derived Product Grant

Discussion:

The City of Lemoore has the opportunity to take advantage of a Tire Derived Product Grant offered by The California Integrated Waste Management Board. This grant would give the City an opportunity to purchase floor surfacing made of recycled tire material for the Corporation Yard. This surfacing would be utilized in areas where members of the community participate in recreational activities such as boxing, basketball and numerous other indoor sports. Products under this grant are available in interlocking tiles or roll out material. The product would have to be used until March 31, 2011 but could be moved from area to area. The products available come with a five year guarantee and would provide a safer surface for recreational activities. This flooring would also enhance the look of the building.

Budget Impact:

The product is 100 percent reimbursed. The reimbursement includes shipping and handling as well as sales tax. Parks and Recreation would make sure that the reimbursement is done in the same fiscal year as the product is placed.

Recommendation:

That the City Council authorize the submittal of an application grant to California Integrated Waste Management Board. (CIWMB).
