## **Staff Report**

**Item #12C**

**To:           Redevelopment Agency**  
**From:       David Wlaschin, Director of Public Works**  
**Date:        March 10, 2010**  
**Subject:     Budget Amendment – Design of 19<sup>th</sup> Avenue Ponding Basin Storm  
               Drain System**

---

**Background:**

Staff is working with Caltrans and the Lemoore Canal & Irrigation District regarding the overpass at 19<sup>th</sup> Avenue and Highway 198. The project involves the relocation of several of our pieces of infrastructure which include our water line, sewer line, lift station, Fox Ditch and 19<sup>th</sup> Avenue Park/Ponding Basin.

The water and sewer work are considered utilities and those costs will be covered by the project. The relocation of the ditch and the storm drainage (basic redesign and construction of basin) are not covered and we will need to front those funds. We would look to recoup costs for design and construction out of the sale of property to Caltrans from the land acquisition funds or from project funds directly.

Timing on this project is critical and we do not want to be the reason for any delay on the project so we would like to have Quad-Knopf be allowed to design the basin and the ditch relocation.

**Budget:**

Cost would be \$120,000 and would be paid from Redevelopment Agency Capital Funds.

**Recommendation:**

That Agency authorize the design of 19<sup>th</sup> Avenue and Highway 198 Storm Drain Improvements by Quad-Knopf in an amount not to exceed \$120,000.
