ATTACHMENT A
Scope of Work for the Silva Lift Station Relocation

Topographic Survey

Perform a topographic survey of the proposed sites of the new lift stations, existing sewer lines that will be intercepted, and streets used for the new force main. Quad Knopf will use existing topographic survey information from other jobs in the area to greatest extent possible in an effort reduce the needed work for this project.

Lift Station Design

The relocation of the Silva lift station will involve the construction of two lift stations one to the north and one to the west of the existing location. The design will include the following:

- Prepare engineering design necessary to complete the Plans, Specifications & Estimates. The package will include the design necessary for two (2) pump stations.
- Coordination with pump manufacturer (FLYGT) for well pump selection.
- Coordination with an Electrical Engineer sub-consultant for controls and conduits.
- Electrical coordination with PG&E.
- Coordinate with the Utility Companies for development of base plans that approximately delineates the utility locations.

Caltrans Coordination

Meet with Caltrans to discuss the location of the new lift stations to ensure they are out of the area of conflict with the 19th Avenue interchange.

Bidding Services

Bidding services will include::

- Prepare and Schedule the Project for Advertising, including the printing of Plans/Specifications for distribution
- Disseminate bid information and respond to inquiries
- Develop and issue addenda such as revised contract specifications, plan sheet revisions, and engineer's estimate
- Open Bids, and Recommend Award
- Prepare the Notice of Award Package, including Contract Sets.
- Review the executed contract prior to City execution.

Construction Oversight (optional)

Construction oversight will include:

- Schedule and attend preconstruction meeting.
- Review, for compliance with design concepts, any shop drawings required to be submitted by the contractor.
- Issue necessary interpretations and clarifications of contract documents, prepare change orders, and make recommendations as to acceptability of the work.
- Determine amounts of progress payments due, based on degree of completion of the work, and recommend issuance of such payments by the client.
- Attend necessary construction meetings.
