## **Staff Report**

**Item # 5 G**

**To: Lemoore City Council**  
**From: David Wlaschin, Public Works Director**  
**Date: August 25, 2010**  
**Subject: Budget Amendment for Three New Hypochlorite Pumps**

---

**Discussion:**

The Water Department is requesting three new hypochlorite pumps. Two of these pumps are to replace existing pumps when they break and one is for the new Well #7 that has been constructed for the arsenic reduction project. These pumps provide the chlorine to our well water to eliminate the hydrogen sulfide odor. The 6-8 week delivery time requires us to have them self ready.

**Budget Impact:**

A budget adjustment for a total of \$11,083.72 is requested. \$3,794.58 is requested from the capital improvement arsenic project and \$7,389.14 is requested from water asset replacement account.

**Recommendation:**

It is recommended that Council approve a budget amendment of \$3,794.58 from the capital improvement arsenic project and \$7,389.14 from water asset replacement account to purchase three new hypochlorite pumps.
